Brief Description of the Drawings

Figure 1 shows the influence of ER α - and ER β - selective ligands on ovarian wet weight in Hypex immature Wistar rats.

b' Figure 2 shows the influence of ER α - and ER β - selective ligands on folliculogenesis in Hypex immature Wistar rats. The histological sections were stained with hematoxylin and eosin, of ovaries treated with vehicle, 17 β -estradiol, ER α -selective ligand (compound B) and an ER β -selective ligand (compound D). The arrows indicate large preantral follicles.

Figure 3 shows the influence of ER α - and ER β -ligands on folliculogenesis and ovulation-rate in the Hypex immature Wistar rat.--
